A QUESTION FOR THE BOARDROOM

Give the keyboard to the backup.

When the builder goes quiet

CIO / portco COO

THE FIELD TEST

Start with a fresh case

Let the backup use the permissions available on shift. The builder observes without coaching.

THE FIELD TEST

Interrupt the task

Replace an input after a draft is ready. Have the operator stop the stale action and route it.

THE FIELD TEST

Prove recovery

Restore the known version, run a safe task and keep the receipt. Record any private help needed.

TAKE IT TO THE MEETING

Who can restore the workflow when your usual expert is away?

The decision guide is free at otomat.ai/insights.
